

Darkhorse Owners' Association **Defensible Space Advisory Request**

Defensible space is the buffer created between a building and the grasses, trees, shrubs, or any wildland area that surround it. This space is needed to slow or stop the spread of wildfire and it helps protect structures from catching fire. Proper defensible space also provides firefighters a safe area in which to work.

Adequate defensible space could help save your home during a wildfire.

The Darkhorse Fire Safety Committee offers a free, no-obligation Defensible Space Advisory visit to all Darkhorse residents. We will walk with you through your property starting with the driveway and provide feedback along with improvement suggestions.

To schedule a Defensible Space Advisory visit, please send an email to DHFireSafety@gmail.com
